The purpose of CTO Networks is to build, manage and maintain computer networks. We help small businesses make sense of the ever-changing world of technology: servers, workstations, printers, firewalls, software, “the cloud”, backup and everything else IT-related.

Small business usually can’t afford to hire full-time IT people, yet they need a full range of IT services. That’s what CTO Networks does—we call it “Small Biz IT Done Right!”

**What CTO Networks Offers:**

—Infrastructure

—Support

—Strategy

**CTOGuard**
